

eGroupGen

Efficient & pragmatic collaborative work

An efficient & pragmatic collaborative portal

eGroupGen is the collaborative portal to your secure workspaces, providing for shared diary management, meeting organization, task allocation and document sharing, and offering each member a personalized access and a complete view of all their workspaces and associated events.

Instant deployment

After just one hour installation time on a web server, workspaces can be created and used on line using a standard browser in any Inter-Intra-Extranet environment.

Easy-to-use interface

eGroupGen offers users an intuitive interface and a range of easy-to-use features for an ultra-short induction without the need for special training.

Real-time follow-up

All members are sent e-mail alerts advising them of the latest events to occur within their workspaces. They can access their personal portals at any time and review everything going on within their workspaces.

Fully secure operation

Workspace access is based on existing directories, connections are secured using SSL and the security of each collaborative event can be individually managed by its owner.

An open and upgradeable solution

eGroupGen was developed using robust and open solutions incorporating proven web development standards (ASP, XML, SQL, SSL, LDAP directory connectors, NT, Exchange, etc.) allowing seamless integration with your existing IT setup.

Characteristics

- 100% Web interface
- SSL security
- Collaborative Workflow
- E-mail Notifications
- Event based permissions
- Standard directories connectors

End User Module

- Customized collaborative portal
- Multi projects views
- Schedule sharing
- Meeting management

Efficient & pragmatic collaborative work

10 Immediate Benefits

1. Create collaborative workspaces quickly and easily and publish them on line for your internal and external user communities.
2. Facilitate, structure and secure information exchange and knowledge sharing between members wherever they are located.
3. Enjoy the benefits of a genuine collaborative portal customized to the users' profiles and seamlessly integrated into your web environment.
4. Enjoy a complete overview of your collaborative workspaces and associated events (diary, tasks, meetings, documents).
5. Use the advanced workflow functions for collective document development and meeting organization.
6. Real-time progress reports by e-mail on your collaborative workspaces (modifications to documents, task allocation, invitation to meetings).
7. Delegate the management of your collaborative workspaces to your operations managers.
8. Capitalize on an open solution which uses industry standard technology (IIS, HTML, ACCESS, SQL SERVER, ORACLE, XML).
9. Synchronize user information from existing directories (NT, Active Directory, Exchange, ERP).
10. Initialize and deploy your collaborative workspaces quickly & easily without the need for training for maximum added value.

Configuration

End User

- Internet Explorer 5+ (PC)

Server

Operating system

- Windows NT 4 SP6a
- Windows 2000 Sp2 +
- Windows 2003

Web Server

- Microsoft IIS

Database

- Microsoft Access 2000 +
- Microsoft SQL Server 7, 2000
- Oracle 7, 8, 9

Minimum hardware configuration

- Pentium III
- 128 MB RAM
- 10 GB disk

Directories supported for authentication

- Microsoft NT domains
- Microsoft Active Directory

Directories supported for user synchronization

Connectors to configure or develop for:

- Microsoft Exchange 5.5
- Microsoft Exchange 2000
- LDAP compatible directory
- ERP (SAP, PEOPLESOFT, etc.)
- Other databases

Configuration & development languages supported

- Microsoft ASP
- Microsoft ASP.NET
